

ExxonMobil's Impact on Climate Change

Documentary Screening

OUT OF BALANCE

w/ Producer Tom Jackson

"Out of Balance: ExxonMobil's Impact on Climate Change" shows the influence that the largest company in the world has on governments, the media and citizens and what can be done about global warming. While the Earth's climate is pushed further out of balance by increasing use of fossil fuels, ExxonMobil continues to assert undue influence around the world—making record profits while ignoring climate science for which there has been overwhelming consensus for over ten years.
